## Mission Statement:

SP Industrial strives to give our customers high-quality service in a friendly and professional manner. Our employees establish a relationship of cooperation with the customer and perform their duties faithfully and diligently.

A full-service provider offering a 24/7 service technician to help customers minimize down time and lost production.

SP Industrial strives to provide its customers with cost competitive options, and doesn't hesitate to introduce ideas for innovation and cost reduction. Working with this industry has taught us that it's the little things that make a difference which compels us to continuously review our own procedures in order to more efficiently complete an installation. Our savings are then passed along to the benefit of our customers.

## Introduction:

With more than 20 years experience in the electrical industry, SP Industrial is dedicated to complete customer satisfaction on each and every project, on time and on budget.

We are qualified, professionally trained installers of lightning protection systems, electrical installations, maintenance, issuing of Certificates of Compliances and infrared inspections, electrical audits and inspections as well as manufacture and supply auto temp monitors.

We seek out organizations that we can build long-term winning relationships with. We feel that it is our responsibility to effectively communicate with our customers, and rest our future continued successes on being the leader in building and maintaining healthy relationships. We believe our success comes only if our customers are successful.

As a growth oriented company, we are always seeking winning relationships with new customers. If your organization is seeking a high-quality Lightning Protection Systems and Electrical services, we would be happy to provide you with a proposal.

# Lightning Protection Systems:

We provide comprehensive structural protection for buildings, houses, earth resistance testing & certification as well as correction to SABS standards.

We also do the earthing and bonding to ensure the best protection possible for all of your equipment

We also do thatch roof protection as a structural need as lightning will damage any thatch roof causing a fire hazard And potentially run in to the house earthing system
